JavaScript	Cross-Browser Compatibility	python

PROJECTS

A digital encyclopedia of the Mahabharata

[Project link](#)

- Allows users to explore the story of Mahabharata.
- Enabling users to search for specific characters like Arjuna or Draupadi and learn about their role in the epic.
- Interactive and visually appealing experience.

A Currency Converter

[Project link](#)

- Allows users to convert amounts of money from one currency to another.
- It typically uses real-time exchange rates to provide accurate conversions.
- Users can input the amount they want to convert and select the currencies they want to exchange. The webpage then displays the converted amount in the target currency.

Rock Paper Scissors game

[Project link](#)

- A responsive web page using HTML, CSS and JavaScript that featured an interactive user interface for seamless gameplay.
- Allows user to play against the computer.
